Dear Colleagues,

It is my great pleasure to welcome you to Thessaloniki, Greece, for the “State of the Art Surgical Symposium – The Last Supper” organized by the First Surgical Department of the Aristotle University of Thessaloniki and the Greek Chapter of the International College of Surgeons. During these two days we will hear about and discuss cutting edge topics in both General and Vascular surgery, as this meeting represents the combined efforts of both surgical specialties. This same spirit is representative of the clinical and research work conducted at the First Department of Surgery of the Aristotle University of Thessaloniki. This meeting will provide us with an opportunity to review the current state of General and Vascular Surgery in Greece, as well as identify future challenges and goals. In this effort we will have the valuable contribution of our esteemed international colleagues.

Along these lines, I am extending a special welcome to the International College of Surgeons. This meeting will signify the beginning of what I believe will be an academically very productive relationship between Greek surgeons and the International College of Surgeons, as a way to exchange experience, knowledge, and most of all promote the education of the future generations of surgeons.

Once again, welcome to Thessaloniki and I hope that you have the opportunity to enjoy the rich history and beautiful sights of the birthplace of Alexander the Great.

**Dimitrios Kiskinis**

Head and Professor of Surgery  
First Department of Surgery  
Aristotle University of Thessaloniki

Dear Members of the International College of Surgeons in Greece and Members of the Greek Surgical Community

As ICS World President, I welcome you to the First Department of Surgery/International College of Surgeons Meeting at Aristotle University, Thessaloniki, Greece, on May 4-5, 2012. I thank the Administrators and Surgeons of the First Surgical Department of the Aristotle University for their willingness to be a collaborative partner with the International College of Surgeons.

Greece is a most important country in Europe. Because of this importance, the status of the ICS Greek Section is of critical interest to the College – we are committed to giving major support to the members of the ICS Greek Section. For these reasons, I commend Dr. Georgios Tsoulfas, a Fellow of the International College of Surgeons, for his efforts in organizing this meeting with the theme “State of the Art Surgical Symposium”, which will address current controversies and topics of interest in general and vascular surgery. The combination of International and Greek speakers will provide an interesting and insightful program of significant educational value.

The International College of Surgeons is a collaborative organization with members in over 105 countries of the world. Our vision is to improve the lives of patients through the education of our members and the development of the field of surgery. We are grateful for this opportunity to reach out to all members of the Greek surgical community and welcome all of you to this joint meeting with the First Surgical Department of the Aristotle University.

I regrettably will not be able to be with you, but I look forward to receiving the report of the meeting. I send very best wishes to all of you for successful discussions.

Sincerely

**Said Dae**, MD

## CONFERENCE DIRECTOR

### **Dimitris Kiskinis**

Professor of Surgery- Vascular Surgery, Aristotle University of Thessaloniki  
Director of 1st Surgery Department, Aristotle University of Thessaloniki,  
Papageorgiou Hospital, Greece

08:30 – 09:00

**REGISTRATION**

09:00 – 10:30

**SESSION 1: GENERAL SURGERY**

**ROUND TABLE:** Update in Rectal Cancer  
**Chairperson:** Athanasios Sakantamis

09:00 – 09:20

Early rectal cancer  
**George Mpasdanis**

09:20 – 09:40

Robotic assisted rectal surgery:  
is it better than conventional laparoscopy?  
**W.L. Law**

09:40 – 10:00

Selection of patients for neoadjuvant chemoradiation  
for cancer  
**Andreas Kaiser**

10:00 – 10:20

Watch and wait after neoadjuvant chemoradiation  
and a complete response  
**Rodrigo Perez**

10:20 – 10:30

**Commentator: Constantine Spanos**  
Discussion

10:30 – 11:00

**COFFEE BREAK**

11:00 – 13:00

**SESSION 2: VASCULAR SURGERY**

**Carotid Artery Disease**  
**Chairpersons:** Thomas Gerasimidis  
Christos Liapis  
**Commentator:** Nikolaos Saratzis

Diagnosis and Imaging  
**Nikolaos Liasis**

The role of the atherosclerotic plaque  
**Christos Liapis**

Patient selection for endovascular treatment  
**Thomas Gerasimidis**

Type of stent – choice of cerebral protection  
**Christos Karkos**

ICA indications - techniques  
**Dimitris Papadimitriou**

ICA stent angioplasty studies  
**George Pitoulis**

Experience and choice of imaging modalities  
**Spyros Basdekis**

Experience from the use of IVUS  
**Themistoklis Toufektsis**

Experience in CAS  
**Nikolaos Melas**

Experience with CEA  
**Konstantinos Katsenis**

Experience with the neck approach  
**Dimitrios Christopoulos**

CAS Experience  
**Dimitris Karamanos**

Management of patients with synchronous CAS  
 and coronary disease  
**Ioannis Velissaris**

13:00 – 14:30

### SESSION 3: GENERAL SURGERY

**ROUND TABLE:**      **Other topics**  
**Chairperson:**      **Ioannis Makris**

13:00 – 13:20

The role of damage control in trauma surgery  
**Evangelos Athanasiou**

13:20 – 13:40

The role of simulation training in surgical education  
**Richard Satava**

13:40 – 14:00

Sarcomas: state-of-the-art surgical management  
**Eelco De Bree**

**14:00 – 14:20**

Surgical management of liver metastatic disease  
**Konstantinos Tsalis**

**14:20 – 14:30**

**Commentator: Spyros Miliaras**  
Discussion

**14:30 – 15:00****LIGHT LUNCH BREAK****15:00 – 16:30****SESSION 4: VASCULAR SURGERY****Peripheral Vascular Disease**

**Chairpersons:** **Dimitrios Papadimitriou**  
**Ioannis Tsolakis**

**Commentator:** **Kyriakos Ktenidis**

Anesthesiological challenges in General and Vascular  
Surgery

**Antigoni Mpakola**

Hybrid procedures involving femoral artery

**Miltiadis Matsagkas**

Occlusive lesion of tibial arteries

**Dimitris Siamplis**

Popliteal artery aneurysms – choice of method of treatment

**Miltiadis Lazaridis**

Splanchnic artery aneurysms and occlusions

**Antonis Filippidis**

Experience from the endovascular repair of SFA lesions -  
complications

**Ilias Dalainas**

Experience from the endovascular repair of the iliac  
arteries TASC II III IV

**Ioannis Kakisis**

Angioplasty experience below the knee - cryoplasty

**Argyrios Giannopoulos**

Experience from the endovascular repair of popliteal  
artery aneurysms

**Petros Chatzigakis**

Experience from splanchnic artery stenosis  
**Ilias Dalainas**

16:30 – 17:00

COFFEE BREAK

17:00 – 18:00

**SESSION 5: VASCULAR SURGERY**

**STATE-OF-THE-ART LECTURE**

**Chairperson: Dimitrios Kiskinis**

The role of diabetes in vascular and endovascular surgery  
and the future of vascular surgery

**Dieter Raithel**

Professor of Vascular Surgery

18:00 – 21:00

**OFFICIAL OPENING CEREMONY OF THE  
CONFERENCE**

18:00 – 18:30

**Welcome Address**  
**Dimitrios Kiskinis**

18:30 – 19:30

**LECTURES**

The history of the First Surgical Department  
**Spyros Miliaras**

The Apostles

The history of the Last Supper in the Art  
**Miltiadis Papanikolaou**  
Professor of History of Art

19:30 – 21:00

**Cocktail Reception**

09:00 – 11:00

## SESSION 6: VASCULAR SURGERY

**ROUND TABLE:** Aortic Aneurysms  
**Chairpersons:** Dimitrios Kiskinis  
Miltiadis Lazaridis  
**Commentator:** Ioannis Lazaridis

Indications for endovascular repair of AAA  
**Thomas Kotsis**

Complications of endovascular approach  
**Aggelos Megalopoulos**

Thoracoabdominal aneurysm management –  
Hybrid technique  
**Kyriakos Ktenidis**

Thoracoabdominal aneurysm management –  
Fenestrated  
**Theodossios Perdikidis**

Ruptured AAA  
**Konstantinos Papazoglou**

Aortoenteric fistulas  
**Stavros Kakkos**

Mutlilayer stent  
**Ioannis Lazaridis**

Excluder stent – graft  
**Ioannis Tsolakis**

Stent-graft Endurant  
**Argyrios Giannopoulos**

Stent – graft Anaconda  
**Nikolaos Saratzis**

Attachment methods for endovascular stents  
**Nikolaos Melas**

Endologix stent graft  
**Kyriakos Ktenidis**

New stent devices (Nelix, in- graft, ...)  
**Prodromos Papapavlou**

11:00 – 11:15

**COFFEE BREAK** 

11:15 – 11:30

**INTERNATIONAL COLLEGE OF SURGEONS  
PRESENTATION**  
**George Tsoulfas**

11:30 – 12:30

**STATE-OF-THE-ART LECTURE AND DISCUSSION**  
**Chairpersons: Dimitris Kiskinis  
Costantine Spanos**

Fistula-in-Ano: from John Arderne to 2012  
**Stanley Goldberg**

12:30 – 14:00

**SESSION 7: GENERAL SURGERY**

**ROUND TABLE: Laparoscopic Surgery**  
**Chairperson: Emmanuel Leandros**

12:30 – 12:50

Role of laparoscopy in colorectal surgery  
**Andreas Kaiser**

12:50 – 13:10

Role of surgery in the obesity epidemic  
**Scott Shikora**

13:10 – 13:30

Single incision colectomy: is there any advantage  
other than cosmesis?  
**W.L. Law**

13:30 – 13:50

Complications in laparoscopic surgery  
**Carol Scott- Conner**

13:50 – 14:00

**Commentator: Kleanthis Giannoulis**  
Discussion

14:00 – 15:00

**LIGHT LUNCH BREAK** 

15:00 – 16:30

## SESSION 8: VASCULAR SURGERY

**ROUND TABLE:** Other topics  
**Chairpersons:** Athanasios Giannoukas  
Christos Gitas  
**Commentator:** Asterios Katsamouris

Endovenous therapy RF- LASER  
**Athanasios Giannoukas**

Traumatic vascular lesions  
**Ioannis Lazaridis**

Vascular access in renal failure patients  
**Nikos Bessias**

Vascular surgery contribution to oncology  
**Kyriakos Ktenidis**

Hemodynamic testing  
**Asterios Katsamouris**

Experience from the use of endovenous treatment methods  
in the management of varicosities  
**John Angelakas**

Experience from popliteal artery injury in knee dislocation  
**George Georgiadis**

Experience from the use of permanent endocardiac  
hemodialysis catheters  
**John Angelakas**

Management of patients with renal cell cancer extension  
into the renal vein  
**Konstantinos Dervissis**

Superior Vena Cava syndrome – endovascular  
management  
**Athanasios Lioupis**

Popliteal artery entrapment syndrome  
**Konstantinos Gkouvas**

16:30 – 17:00

**COFFEE BREAK**

17:00 – 17:30

**INTERNATIONAL COLLEGE OF SURGEONS  
GREEK CHAPTER MEETING**

17:30 – 19:00

**SESSION 9: GENERAL SURGERY**

**ROUND TABLE: Future challenges in Surgical  
Education**

**Chairperson: Konstantinos Simopoulos**

17:30 – 17:50

The OR of the future  
**W.L. Law**

17:50 – 18:10

The “triple threat” surgeon: is that still feasible?  
**J. F. Fung**

18:10 – 18:30

The liver surgeon in the molecular and technology age  
**Yuman Fong**

18:30 – 19:00

**Commentator: George Tsoulfas**  
Discussion

19:30

**CLOSING REMARKS**  
**Adjustment and end of the Conference**

## LOCATION OF THE CONFERENCE

### Thessaloniki

Thessaloniki is the second major economic, industrial, commercial and political centre in Greece with a population of 1,200,000 inhabitants. It is one of the oldest cities in Europe, founded in about 315 B.C., on a site of old prehistoric settlements going back to 2300 B.C., by Cassander, King of Macedonia, and was named after his wife, Thessaloniki, sister of Alexander The Great. Since then, Thessaloniki has become the chief city of Macedonia and a major transportation hub for southeastern Europe.

Thessaloniki retains several Ottoman and Roman structures as well as a large number of Byzantine architectural monuments. Among them the Rotonda of St. George, the churches of St. Demetrius, Panagia Acheiropoietus, Aghia Sophia and the well-known White Tower.

In addition to the Aristotle University of Thessaloniki, there are numerous institutions that contribute to the academic and cultural life of the city. Among them are the University of Macedonia, the Archaeological and Byzantine Museums, the Folklore Museum, the State Conservatory, Theatres and Orchestras, the Society of Macedonian Studies, the Institute of Balkan Studies and other cultural and artistic institutions.

### Papageorgiou Hospital

*Thessaloniki Ring Road, 56429 N. Efkarpia  
Thessaloniki, GREECE  
Tel.: 0030 2313 323000*

Papageorgiou General Hospital has a wide range of clinics, including pathology and surgery, cardiology and heart surgery, neurology and neurosurgery, and orthopaedics. It also has an outpatient clinic with 60 consulting rooms, in all the specialities, and the capacity to deal with 1,200 patients per day and 300,000 per year.

## **LANGUAGE** -----

The official language of the Conference is English and Greek.

## **EXHIBITION** -----

The sponsor companies form the **focal point of the Conference with an exhibition of pharmaceutical products, medical devices and books**. The commercial exhibition takes place next to the Conference Hall where space is limited and those interested should reserve a space as soon as possible. **For further information, please contact the Secretariat of the Conference.**

## **NAME BADGES** -----

Delegates and accompanying persons are obliged to wear the official Conference name badges on all occasions, at the location of the Conference.

## **CERTIFICATES OF ATTEDANCE** -----

Certificates of Attendance will be issued to all registered delegates by the Secretariat of the Conference.

## **TECHNICAL EQUIPMENT** -----

The Conference Hall is equipped with data projectors as well as PCs for speakers' needs. **Speakers are kindly requested to use English language, check and deliver their presentation to the Technical Secretariat of the Conference, at least one hour before their scheduled presentation.**

## **WEBSITE** -----

The website of the conference is updated on a regular basis and gives the latest details on the Scientific Programme and other useful information.

## **REGISTRATION**

**Registration to attend the Conference is free.**

## GUEST FACULTY CVs

### Yuman Fong

Dr. Fong is an attending surgeon at the Memorial Sloan-Kettering Cancer Center (MSKCC), where he holds the Murray F. Brennan Chair in Surgery. He is a Professor of Surgery at Weill Cornell Medical College. Dr. Yuman Fong received a BA in medieval literature from Brown University in 1981, and an MD from Cornell University Medical College in 1984. This was followed by surgical training at the New York Hospital /Cornell

Medical Center under Dr. G. Thomas Shires, a research fellowship under Dr. Stephen Lowry, and a surgical oncology fellowship with Dr. Murray F. Brennan at the Memorial Sloan-Kettering Cancer Center.

Dr. Fong is best known clinically for his extensive work in the field of hepatobiliary surgery — especially for hepatocellular carcinoma, hepatic metastases from colorectal cancer, gallbladder cancer, and cholangiocarcinoma. He has pioneered many surgical, laparoscopic, and ablative therapies for these cancers that occur in over a million people yearly worldwide. Nationally and internationally, he has also participated in and coordinated many studies aimed at understanding, preventing, and treating these cancers. In particular, he is focused on developing low cost and minimally invasive treatments for these cancers that are particularly common in emerging nations.

Dr. Fong leads an active laboratory studying the use of genetically modified viruses for the killing of cancer. He was one of the first investigators to administer engineered viruses into the blood stream of humans for treatment of cancer. He is active at coordinating trials of such novel viruses in international clinical trials. He has co-authored over 500 peer reviewed articles and numerous text books.

He is a member of numerous of scientific and medical societies including the American Surgical Association, Southern Surgical Association, and American Society for Clinical Investigation. He has served on the editorial boards of 14 journals. He has received many honors and awards including the James IV Surgical Traveler, and the Shipley Award from the Southern Surgical Association. He has served on the board of the Society for Surgery of the Alimentary Tract and the board of the James IV Society of Surgeons. He has been Chair of the Gastrointestinal Organ Site Committee of the ACS Oncology Group. He is currently Chair of the recombinant DNA advisory committee of the National Institutes of Health.

## Stanley Goldberg

Stanley M. Goldberg, M.D. has been at the forefront of colon and rectal surgical education for over half a century. He was born and educated in Minneapolis where he first received a Bachelor's degree *cum laude* in 1953. In 1956, he graduated from the University of Minnesota Medical School and also completed his General Surgery and Colon and Rectal Surgery training at the University of Minnesota. He was awarded an American Cancer Society grant in 1962 to study at St. Mark's Hospital in London. On his return, he joined the clinical faculty in the Division of Colon and Rectal Surgery, Department of Surgery at the University

of Minnesota. At the same time, he became a founding partner of Colon and Rectal Surgery Associates, Ltd.; the practice that has had a long-standing relationship with the University of Minnesota Medical School.

In 1972, Dr. Goldberg was named a Clinical Professor at the University of Minnesota Medical School, where he served as the Director of the Division of Colon and Rectal Surgery until 1992.

Internationally, Dr. Goldberg has been awarded recognition by some of the most prestigious surgical colleges in the world. Among the many Honorary Fellowships he holds are from the Royal College of Surgeons of England, the Royal Australasian College of Surgeons, the Royal College of Surgeons of Edinburgh, Royal College of Physicians and Surgeons of Glasgow, Spanish Association of Surgeons, Philippine College of Surgeons, Honoris Causa in Lleida and in 2008, he received an honorary membership from the Japanese Surgical Society. Dr. Goldberg is among the few American surgeons to have been awarded an Hono-

rary Fellowship by the Royal Society of Medicine of England and the Association of French Surgeons. In 1996, he received the Harold S. Diehl, M.D. Award from the University of Minnesota Medical School in recognition of his outstanding accomplishments. In 2000, the Stanley M. Goldberg, M.D., F.A.C.S. Chair in Colon and Rectal Surgery, Division of Colon and Rectal Surgery, Department of Surgery at the University of Minnesota Medical School was established. Dr. Goldberg received the Surgical Alumnus of the Year Award in 2006 from the University of Minnesota Department of Surgery.

As a prolific writer in the field of colon and rectal surgery, his name often appears at the end of the list of authors; a sign that it is his department and his inspiration that has been responsible for the scientific standards and the surgical infrastructure. He has the reputation of inspiring enormous loyalty in the many fellows from around the world who have gone to work in his active department. His technical competence, his availability, and his wisdom are legendary. Dr. Goldberg is a member of the editorial board of many prestigious surgical journals. He continues to serve as an ambassador for the University of Minnesota, enhancing its profile to a worldwide audience.

### Andreas Kaiser

Professor Kaiser grew up in Switzerland but now lives in Los Angeles. He did both his Medical School (1988) and General Surgery training in Switzerland. He spent two years for research at Beth Israel Hospital and Harvard Medical School in Boston. After doing Visceral Surgery at the University Hospital in Zurich, he completed in 2001 a fellowship in Colorectal Surgery at the Keck School of Medicine of the University of Southern California where he has been on the faculty since. Dr. Kaiser has received the Swiss FMH Board Certification in General Surgery, as well as in Visceral Surgery, and the European

EBSQ Board Certification in Coloproctology. From 2008 to 2009, he served as the Chairman of the Department of Colorectal Surgery at the University of Southern California in Los Angeles. He is a Fellow of the American College of Surgeons (FACS), the American Society of Colon and Rectal Surgeons (FASCRS), and a member of several national and international professional associations.

### W.L. Law

Professor Law graduated from Faculty of Medicine, The University of Hong Kong in 1987. He obtained the fellowship of the Royal College of Surgeons of Edinburgh in 1991. He was then trained in colorectal surgery and received his overseas training in Houston, Texas. He was conferred the degree of Master of Surgery in 2001 and the research was on surgical treatment for rectal cancer. Professor Law was appointed as the Clinical Professor of Surgery at The University of Hong Kong in 2008. Currently he is the Chief of Division of Colorectal Surgery at Queen Mary Hospital. He is also the Director of Skills Development

Centre in the Department of Surgery, The University of Hong Kong.

Professor Law's main clinical and research interests are in colorectal and minimally invasive surgery. He has been active in developing advanced laparoscopic techniques, transanal endoscopic surgery, robotic surgery and natural orifice transluminal endoscopic surgery. Professor

Professor Law is a member of numerous professional societies. He was on the Education Resources Committee of the Society of American Gastrointestinal and Endoscopic Surgeons and the Membership Committee of the American Society of Colon and Rectal Surgeons. He is currently the Secretary-General of the International Society for Digestive Surgery and a committee member of the International Society of Laparoscopic Colorectal Surgery. Professor Law has authored over 120 articles in peer-reviewed journals and has given numerous lectures, both in Hong Kong and overseas. He is currently on the editorial board of about 10 journals including *Surgical Practice*.

## Richard Satava

Richard Satava, MD, FACS, is Professor of Surgery at the University of Washington Medical Center, and Senior Science Advisor at the US Army Medical Research and Materiel Command (USAMRMC) in Ft. Detrick, MD.

He has been continuously active in surgical education and surgical research, with more than 200 publications and book chapters in diverse areas of advanced surgical technology.

During his 23 years of military surgery he has been an active flight surgeon. While striving to practice the complete discipline of surgery, he is aggressively pursuing the leading edge of advanced technologies to formulate the architecture for the next generation of Medicine.

During the current tour at USAMRMC he has been involved in numerous research initiatives, including simulation and skills training, combat casualty care, robotic surgery and battlefield medicine, the Blast Program, the Armed Forces Institutes for Regenerative Medicine, and the Virtual Autopsy, with a focus on harvesting revolutionary technologies and transitioning them into the mainstream DoD acquisition process. He has fostered the development of at least 3 new areas of medical science – surgical simulation, robotic surgery and plasma medicine, which did not exist before they became DoD programs under his management.

# Repositioning

the future of EVAR

PERFORMANCE by design

FEATURING

**C3**

DELIVERY  
SYSTEM

## Repositioning = Control<sup>3</sup>

- 3 controlled deployments of the proven GORE® EXCLUDER® Device.
- 3 chances to maximize seal in the infrarenal aortic neck.
- 3 opportunities to rotate the stent-graft for precise orientation.

## Reposition Your Expectations for EVAR

When facing a challenging infrarenal neck, don't settle for one 'controlled' deployment. Put yourself in the best position to succeed — put the confidence of the GORE® C3 Delivery System in your hands. And you will have not one, not two, but three opportunities to go beyond control — and reposition the future of EVAR.
